

# SAFETY DATA SHEET

New Zealand

## Section 1. Identification

Product name

**Oligosynt™ T 40s 15, 10 x 15 µmole**

Catalogue Number

17-5213-01

9 0 1 7 5 2 1 3 0 1

Other means of identification

Not available.

Product type

Liquid.

### Identified uses

Analytical chemistry.

Use in laboratories

Scientific research and development

### Supplier

Cytiva  
Amersham Place  
Little Chalfont  
Buckinghamshire  
HP7 9NA United Kingdom  
+44 0800 515 313

Cytiva New Zealand  
Buddle Findlay, Level 18, Pricewaterhousecooper Tower,  
188 Quay Street,  
Auckland, Auckland, 1010  
New Zealand

Person who prepared the MSDS :

sds\_author@cytiva.com

Emergency telephone number (with hours of operation)

0800 733 893  
(10am - 7pm)

## Section 2. Hazards identification

HSNO Classification

3.1 - FLAMMABLE LIQUIDS - Category B  
6.1 - ACUTE TOXICITY (oral) - Category B  
6.1 - ACUTE TOXICITY (dermal) - Category D  
6.1 - ACUTE TOXICITY (inhalation) - Category C  
6.4 - EYE IRRITATION - Category A (Irritant)  
9.2 - SOIL ECOTOXICITY - Category D  
9.3 - TERRESTRIAL VERTEBRATE ECOTOXICITY - Category A

This material is classified as hazardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001 and has been classified according to the Hazardous Substances (Classifications) Regulations 2001.

### GHS label elements

Signal word

Danger

Hazard statements

Highly flammable liquid and vapour.  
Fatal if swallowed.  
Toxic if inhaled.  
Harmful in contact with skin.  
Causes serious eye irritation.  
Harmful to the soil environment.  
Very toxic to terrestrial vertebrates.

Precautionary statements

Prevention

Wear protective gloves. Wear eye or face protection. Wear protective clothing. Keep away from ignition sources such as heat/sparks/open flame. - No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Avoid breathing vapour. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.

Response

Collect spillage. Immediately call a POISON CENTER or doctor/physician. IF SWALLOWED: Rinse mouth. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water [or shower]. Wash with plenty of soap and water. Wash contaminated clothing before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.

9 5 1 7 5 2 1 3 0 1

|                 |   |
|-----------------|---|
| <b>Storage</b>  | Store locked up. Store in a well-ventilated place. Keep cool.   |
| <b>Disposal</b> | Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| <b>Symbol</b>   |   |

**Other hazards which do not result in classification** None known.

### Section 3. Composition/information on ingredients

|  |                 |
|--|-----------------|
| <b>Substance/mixture</b>                   | Mixture         |
| <b>Other means of identification</b>       | Not available.  |
| <b><u>CAS number/other identifiers</u></b> |                 |
| <b>CAS number</b>                          | Not applicable. |
| <b>EC number</b>                           | Mixture.        |
| <b>Product code</b>                        | 17-5213-01      |

| <b>Ingredient name</b> | <b>%</b> | <b>CAS number</b> |
|------------------------|----------|-------------------|
| acetonitrile           | 70 - 85  | 75-05-8           |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

|                     |  |
|---------------------|--|
| <b>Inhalation</b>   | Get medical attention immediately. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| <b>Ingestion</b>    | Get medical attention immediately. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
| <b>Skin contact</b> | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| <b>Eye contact</b>  | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |

#### Most important symptoms/effects, acute and delayed

##### Potential acute health effects

|                     |                                |
|---------------------|--------------------------------|
| <b>Inhalation</b>   | Toxic if inhaled.              |
| <b>Ingestion</b>    | Fatal if swallowed.            |
| <b>Skin contact</b> | Harmful in contact with skin.  |
| <b>Eye contact</b>  | Causes serious eye irritation. |

##### Over-exposure signs/symptoms

|                   |                   |
|-------------------|-------------------|
| <b>Inhalation</b> | No specific data. |
| <b>Ingestion</b>  | No specific data. |
| <b>Skin</b>       | No specific data. |

|             |  |
|-------------|--|
| <b>Eyes</b> | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
|-------------|--|

**Indication of immediate medical attention and special treatment needed, if necessary**

|                                   |   |
|-----------------------------------|---|
| <b>Specific treatments</b>        | Not available.  |
| <b>Notes to physician</b>         | In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.   |
| <b>Protection of first-aiders</b> | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

**Section 5. Firefighting measures****Extinguishing media**

|   |  |
|---|--|
| <b>Suitable</b>                                       | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| <b>Not suitable</b>                                   | Do not use water jet.  |
| <b>Specific hazards arising from the chemical</b>     | Highly flammable liquid and vapour. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.  |
| <b>Hazardous thermal decomposition products</b>       | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides  |
| <b>Hazchem code</b>                                   | Not available.   |
| <b>Special precautions for fire-fighters</b>          | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| <b>Special protective equipment for fire-fighters</b> | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

**Section 6. Accidental release measures**

|  |  |
|--|--|
| <b>Personal precautions, protective equipment and emergency procedures</b> | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8). |
| <b>Environmental precautions</b>   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |

**Methods and material for containment and cleaning up**

|                    |  |
|--------------------|--|
| <b>Small spill</b> | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.   |
| <b>Large spill</b> | Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

**Section 7. Handling and storage**

|                                      |  |
|--------------------------------------|--|
| <b>Precautions for safe handling</b> | Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--------------------------------------|--|

**Conditions for safe storage, including any incompatibilities**

Store between the following temperatures: 4 to 30°C (39.2 to 86°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

**Section 8. Exposure controls/personal protection****Control parameters****Occupational exposure limits**

**Ingredient name**  
acetonitrile

**Exposure limits**

**NZ HSWA 2015 (New Zealand, 11/2018).**

**Absorbed through skin.**

WES-STEL: 101 mg/m<sup>3</sup> 15 minutes.

WES-STEL: 60 ppm 15 minutes.

WES-TWA: 67 mg/m<sup>3</sup> 8 hours.

WES-TWA: 40 ppm 8 hours.

**Appropriate engineering controls**

Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

**Environmental exposure controls**

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

**Individual protection measures****Hygiene measures**

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

**Respiratory protection**

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Hand protection**

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

**Eye protection**

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

**Skin protection**

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

**Section 9. Physical and chemical properties****Appearance**

|   |  |
|---|--|
| <b>Physical state</b>                               | Liquid. [(White suspension in closed column.)] |
| <b>Colour</b>                                       | solution : Colourless. / Suspension : White.   |
| <b>Odour</b>  | Ethereal. / Sweetish.                          |
| <b>Odour threshold</b>                              | 40 ppm   |
| <b>pH</b>   | Not applicable.                                |
| <b>Melting point</b>                                | Not available.                                 |
| <b>Boiling point</b>                                | Not available.                                 |
| <b>Flash point</b>                                  | Closed cup: 15 to 20°C (59 to 68°F)            |
| <b>Burning rate</b>                                 | Not applicable.                                |
| <b>Burning time</b>                                 | Not applicable.                                |
| <b>Evaporation rate</b>                             | Not available.                                 |
| <b>Flammability (solid, gas)</b>                    | Not available.                                 |
| <b>Lower and upper explosive (flammable) limits</b> | Not available.                                 |

|  |                |
|--|----------------|
| <b>Vapour pressure</b>                             | Not available. |
| <b>Vapour density</b>                              | Not available. |
| <b>Relative density</b>                            | Not available. |
| <b>Solubility</b>                                  | Not available. |
| <b>Solubility in water</b>                         | Not available. |
| <b>Partition coefficient: n-octanol/<br/>water</b> | Not available. |
| <b>Auto-ignition temperature</b>                   | Not available. |
| <b>Decomposition temperature</b>                   | Not available. |
| <b>SADT</b>  | Not available. |
| <b>Viscosity</b>                                   | Not available. |
| <b>Flow time (ISO 2431)</b>                        | Not available. |

**Aerosol product**

|   |                 |
|---|-----------------|
| <b>Type of aerosol</b>                                    | Not applicable. |
| <b>Heat of combustion</b>                                 | Not available.  |
| <b>Ignition distance</b>                                  | Not applicable. |
| <b>Enclosed space ignition - Time<br/>equivalent</b>      | Not applicable. |
| <b>Enclosed space ignition -<br/>Deflagration density</b> | Not applicable. |
| <b>Flame height</b>                                       | Not applicable. |
| <b>Flame duration</b>                                     | Not applicable. |

**Section 10. Stability and reactivity**

|   |   |
|---|---|
| <b>Chemical stability</b>                     | The product is stable.  |
| <b>Possibility of hazardous<br/>reactions</b> | Under normal conditions of storage and use, hazardous reactions will not occur.   |
| <b>Conditions to avoid</b>                    | Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| <b>Incompatible materials</b>                 | Reactive or incompatible with the following materials:<br>oxidizing materials   |
| <b>Hazardous decomposition<br/>products</b>   | Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

**Section 11. Toxicological information****Information on likely routes of exposure**

|                     |                                |
|---------------------|--------------------------------|
| <b>Inhalation</b>   | Toxic if inhaled.              |
| <b>Ingestion</b>    | Fatal if swallowed.            |
| <b>Skin contact</b> | Harmful in contact with skin.  |
| <b>Eye contact</b>  | Causes serious eye irritation. |

**Symptoms related to the physical, chemical and toxicological characteristics**

|                     |  |
|---------------------|--|
| <b>Inhalation</b>   | No specific data.  |
| <b>Ingestion</b>    | No specific data.  |
| <b>Skin contact</b> | No specific data.  |
| <b>Eye contact</b>  | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |

**Delayed and immediate effects as well as chronic effects from short and long-term exposure****Acute toxicity**

| <b>Product/ingredient name</b> | <b>Result</b>        | <b>Species</b> | <b>Dose</b> | <b>Exposure</b> |
|--------------------------------|----------------------|----------------|-------------|-----------------|
| acetonitrile                   | LC50 Inhalation Gas. | Rat            | 17100 ppm   | 4 hours         |
|                                | LD50 Dermal          | Rabbit         | 980 mg/kg   | -               |
|                                | LD50 Oral            | Rat            | 2460 mg/kg  | -               |

**Irritation/Corrosion**

Not available.

**Sensitisation**

Not available.

**Potential chronic health effects**

|                              |   |
|------------------------------|---|
| <b>General</b>               | No known significant effects or critical hazards. |
| <b>Inhalation</b>            | No known significant effects or critical hazards. |
| <b>Ingestion</b>             | No known significant effects or critical hazards. |
| <b>Skin contact</b>          | No known significant effects or critical hazards. |
| <b>Eye contact</b>           | No known significant effects or critical hazards. |
| <b>Carcinogenicity</b>       | No known significant effects or critical hazards. |
| <b>Mutagenicity</b>          | No known significant effects or critical hazards. |
| <b>Teratogenicity</b>        | No known significant effects or critical hazards. |
| <b>Developmental effects</b> | No known significant effects or critical hazards. |
| <b>Fertility effects</b>     | No known significant effects or critical hazards. |

**Chronic toxicity**

Not available.

**Carcinogenicity**

Not available.

**Mutagenicity**

Not available.

**Teratogenicity**

Not available.

**Reproductive toxicity**

Not available.

**Specific target organ toxicity**

Not available.

**Aspiration hazard**

Not available.

**Numerical measures of toxicity****Acute toxicity estimates**

| Route                | ATE value     |
|----------------------|---------------|
| Oral                 | 6.45 mg/kg    |
| Dermal               | 1264.52 mg/kg |
| Inhalation (vapours) | 3.87 mg/l     |

**Section 12. Ecological information****Ecotoxicity** No known significant effects or critical hazards.**Aquatic and terrestrial toxicity**

| Product/ingredient name | Result                                | Species                      | Exposure |
|-------------------------|---------------------------------------|------------------------------|----------|
| acetonitrile            | Acute IC50 3685000 µg/l Fresh water   | Aquatic plants - Lemna minor | 96 hours |
|                         | Acute LC50 3600000 µg/l Fresh water   | Daphnia - Daphnia magna      | 48 hours |
|                         | Acute LC50 1000000 µg/l Fresh water   | Fish - Pimephales promelas   | 96 hours |
|                         | Chronic NOEC 1000000 µg/l Fresh water | Aquatic plants - Lemna minor | 96 hours |
|                         | Chronic NOEC 160000 µg/l Fresh water  | Daphnia - Daphnia magna      | 21 days  |

**Persistence/degradability**

| Product/ingredient name | Aquatic half-life | Photolysis     | Biodegradability |
|-------------------------|-------------------|----------------|------------------|
| acetonitrile            | -                 | 98%; 28 day(s) | Readily          |

**Bioaccumulative potential**

| Product/ingredient name | LogP <sub>ow</sub> | BCF        | Potential |
|-------------------------|--------------------|------------|-----------|
| acetonitrile            | -0.34              | 0.3 to 0.4 | low       |

**Mobility in soil**Soil/water partition coefficient ( $K_{oc}$ ) Not available.**Other adverse effects** No known significant effects or critical hazards.**Section 13. Disposal considerations****Disposal methods**

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

**Section 14. Transport information**

| Regulatory information   | UN number   | Proper shipping name | Classes | PG* |
|--------------------------|---|----------------------|---------|-----|
| <b>New Zealand Class</b> | UN1648  | Acetonitrile mixture | 3       | II  |

**Key to abbreviations**

ADG = Australian Dangerous Goods  
ADR = The European Agreement concerning the International Carriage of Dangerous Goods by Road  
ATE = Acute Toxicity Estimate  
BCF = Bioconcentration Factor  
GHS = Globally Harmonized System of Classification and Labelling of Chemicals  
IATA = International Air Transport Association  
IBC = Intermediate Bulk Container  
IMDG = International Maritime Dangerous Goods  
LogPow = logarithm of the octanol/water partition coefficient  
MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)  
RID = The Regulations concerning the International Carriage of Dangerous Goods by Rail  
UN = United Nations
