

## SAFETY DATA SHEET

Conforms to EU Directive 91/155/EEC, as amended by 2001/58/EC - United Kingdom (UK)  
English

### 1. Identification of the substance/preparation and company/undertaking

Product name

**EA Reagent; part of 'HitHunter™ cAMP XS+  
Screening Assay (40 000 tests)'**

Catalogue Number

DX90007504SZ

Product type

liquid.

#### Company/undertaking identification

Supplier

GE Healthcare UK Ltd  
Amersham Place  
Little Chalfont  
Buckinghamshire HP7 9NA  
England  
+44 0870 606 1921

Emergency telephone number

Swedish Poisons Information Centre :  
+46 (0)8 331 231

Person who prepared the MSDS : msdslifesciences@ge.com

### 2. Hazards identification

The product is not classified as dangerous according to Directive 1999/45/EC and its amendments.

Classification

Not classified.

See section 11 for more detailed information on health effects and symptoms.

### 3. Composition/information on ingredients

Substance/preparation

Preparation

Within the present knowledge of the supplier, this product does not contain any hazardous ingredients in quantities requiring reporting in this section, in accordance with EU or national regulations.

### 4. First-aid measures

#### First-aid measures

Inhalation

If inhaled, remove to fresh air. Get medical attention if symptoms appear.

Ingestion

Do not ingest. Get medical attention if symptoms appear.

Skin contact

Wash with soap and water. Get medical attention if symptoms appear.

Eye contact

In case of contact with eyes, rinse immediately with plenty of water. Get medical attention if irritation occurs.

Protection of first-aiders

No action shall be taken involving any personal risk or without suitable training.

See section 11 for more detailed information on health effects and symptoms.

Article Number

67600035-4

Validation date 31 August 2009

Version 2

## 5. Fire-fighting measures

### Extinguishing media

<b>Suitable</b>	Use an extinguishing agent suitable for the surrounding fire.
<b>Not suitable</b>	None known.
<b>Special exposure hazards</b>	<p>☑ In a fire or if heated, a pressure increase will occur and the container may burst.</p> <p>☑ Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.</p>
<b>Special protective equipment for fire-fighters</b>	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## 6. Accidental release measures

<b>Personal precautions</b>	☑ No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment (see section 8).
<b>Environmental precautions</b>	☑ Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
<b>Large spill</b>	☑ Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Note: see section 1 for emergency contact information and section 13 for waste disposal.
<b>Small spill</b>	☑ Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

## 7. Handling and storage

<b>Handling</b>	☑ Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking.
<b>Storage</b>	☑ Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

### Packaging materials

<b>Recommended</b>	Use original container.
--------------------	-------------------------

## 8. Exposure controls/personal protection

<b>Exposure limit values</b>	Not available.
------------------------------	----------------

### Exposure controls

<b>Occupational exposure controls</b>	☑ No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.
<b>Respiratory protection</b>	☑ Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
<b>Hand protection</b>	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
<b>Eye protection</b>	☑ Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.
<b>Skin protection</b>	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
<b>Environmental exposure controls</b>	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## 9. Physical and chemical properties

### General information

#### Appearance

Physical state                      Liquid.

### Important health, safety and environmental information

Explosive properties              Non-explosive in the presence of the following materials or conditions: open flames, sparks and static discharge, heat, shocks and mechanical impacts, oxidizing materials, reducing materials, combustible materials, organic materials, metals, acids, alkalis and moisture.

Solubility                              Easily soluble in the following materials: cold water and hot water.

## 10. Stability and reactivity

Stability                                The product is stable.

Materials to avoid                  No specific data.

## 11. Toxicological information

### Potential acute health effects

Inhalation                            No known significant effects or critical hazards.

Ingestion                            No known significant effects or critical hazards.

Skin contact                        No known significant effects or critical hazards.

Eye contact                         No known significant effects or critical hazards.

### Acute toxicity

Conclusion/Summary              Not available.

### Potential chronic health effects

Chronic effects                      No known significant effects or critical hazards.

Carcinogenicity                    No known significant effects or critical hazards.

Mutagenicity                        No known significant effects or critical hazards.

Reproductive toxicity            No known significant effects or critical hazards.

Developmental effects            No known significant effects or critical hazards.

Fertility effects                     No known significant effects or critical hazards.

### Over-exposure signs/symptoms

Inhalation                            No specific data.

Ingestion                            No specific data.

Skin                                    No specific data.

Eyes                                    No specific data.

Target organs                        Contains material which may cause damage to the following organs: skin, eyes, stomach.

## 12. Ecological information

Environmental effects              No known significant effects or critical hazards.

Conclusion/Summary              Not available.

Conclusion/Summary              Not available.

Other adverse effects              No known significant effects or critical hazards.

## 13. Disposal considerations

Methods of disposal                The generation of waste should be avoided or minimised wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Hazardous waste                    Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 91/689/EEC.

14. Transport information

International transport regulations

Not classified.

-

15. Regulatory information

EU regulations

Classification and labeling have been determined according to EU Directives 67/548/EEC and 1999/45/EC (including amendments) and take into account the intended product use.

Risk phrases	This product is not classified according to EU legislation.
Product use	<input checked="" type="checkbox"/> Industrial applications.
Europe inventory	<input checked="" type="checkbox"/> All components are listed or exempted.

Other EU regulations

16. Other information

Indicates information that has changed from previously issued version.
