

# SAFETY DATA SHEET

New Zealand

Section 1. Identification

**Product name** 

Cy™5-dCTP, 25 nmol

**Catalogue Number** 

PA55021

Other means of identification

Not available.

**Product type** 

Liquid.

Identified uses

Use in laboratories

Supplier

Cytiva

Amersham Place Little Chalfont

Buckinghamshire

Section 2. Hazards identification

**HSNO Classification** 

6.5 - SENSITIZATION - Category A (Respiratory) 6.5 - SENSITIZATION - Category B (Skin)

This material is classified as hazardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001 and has been classified according to the Hazardous Substances (Classifications) Regulations 2001.

**GHS** label elements

Signal word Danger

**Hazard statements** May cause allergy or asthma symptoms or breathing difficulties if inhaled.

May cause an allergic skin reaction.

**Precautionary statements** 

Prevention Wear protective gloves. In case of inadequate ventilation wear respiratory protection. Avoid

breathing vapour. Contaminated work clothing should not be allowed out of the workplace.

IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical Response

advice/attention. Wash contaminated clothing before reuse. IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If experiencing

respiratory symptoms: Call a POISON CENTER or doctor/physician.

Storage Not applicable.

Disposal Dispose of contents and container in accordance with all local, regional, national and international

regulations.

**Symbol** 

Other hazards which do not result in classification

None known.

Cy<sup>™</sup>5-dCTP, 25 nmol PA55021

## Section 3. Composition/information on ingredients

Substance/mixture Mixture Other means of identification Not available

**CAS** number/other identifiers

CAS number Not applicable. EC number Mixture. **Product code** PA55021

Ingredient name % **CAS** number

Cy5-CTP 0.12

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

#### Section 4. First aid measures

#### Description of necessary first aid measures

Inhalation If inhaled, remove to fresh air. Get medical attention if symptoms appear.

Ingestion Do not ingest. Get medical attention if symptoms appear.

Skin contact Wash with soap and water. Get medical attention if irritation develops.

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check Eye contact

for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical

attention if irritation occurs.

#### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

Inhalation May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Ingestion No known significant effects or critical hazards.

Skin contact May cause an allergic skin reaction.

Eye contact No known significant effects or critical hazards.

#### Over-exposure signs/symptoms

Inhalation Adverse symptoms may include the following:

wheezing and breathing difficulties

asthma

Ingestion No specific data.

Skin Adverse symptoms may include the following:

redness

Eyes No specific data.

#### Indication of immediate medical attention and special treatment needed, if necessary

Specific treatments Not available

Notes to physician No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if

large quantities have been ingested or inhaled.

Protection of first-aiders No action shall be taken involving any personal risk or without suitable training. If it is suspected

that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear

## See toxicological information (Section 11)

## Section 5. Firefighting measures

#### **Extinguishing media**

Suitable Use an extinguishing agent suitable for the surrounding fire.

Not suitable None known.

Specific hazards arising from the In a fire or if heated, a pressure increase will occur and the container may burst.

chemical

Hazardous thermal decomposition products No specific data.

Hazchem code

Not available.

Article Number 25005445 Page: 2/7

Cy™5-dCTP, 25 nmol PA55021

Special precautions for firefighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

equipment and emergency procedures

Personal precautions, protective No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).

**Environmental precautions** 

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

### Methods and material for containment and cleaning up

Small spill

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if watersoluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. Stop leak if without risk. Move containers from spill area. Approach the release from upwind.

Large spill

Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and storage

Precautions for safe handling

Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Persons with a history of skin sensitisation problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Conditions for safe storage, including any incompatibilities Store between the following temperatures: -30 to -15°C (-22 to 5°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and wellventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

### Section 8. Exposure controls/personal protection

#### **Control parameters**

### Occupational exposure limits

None

Appropriate engineering controls

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

**Environmental exposure** controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### **Individual protection measures**

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Respiratory protection

Hand protection

A respirator is not needed under normal and intended conditions of product use.

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Eye protection

Skin protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

of protection: safety glasses with side-shields.

Section 9. Physical and chemical properties

#### **Appearance**

Physical state Liquid. Colour Blue. Odour Odourless. Not available. **Odour threshold** 

pН 7 [Conc. (% w/w): 100%]

0°C (32°F) **Melting point** 100°C (212°F) **Boiling point** Flash point Not applicable. **Burning rate** Not applicable. **Burning time** Not applicable. **Evaporation rate** Not available. Flammability (solid, gas) Not available. Not available. Lower and upper explosive

(flammable) limits

Vapour pressure Not available. Vapour density Not available. Relative density Not available.

Solubility Easily soluble in the following materials: cold water and hot water.

Solubility in water Partition coefficient: n-octanol/

water

Not available. Not available.

**Auto-ignition temperature** Not available **Decomposition temperature** Not available SADT Not available. Not available. Viscosity Flow time (ISO 2431) Not available.

**Aerosol product** 

Type of aerosol Not applicable. Heat of combustion Not available. Ignition distance Not applicable. **Enclosed space ignition - Time** Not applicable.

equivalent

Enclosed space ignition -Deflagration density

Not applicable.

Flame height Not applicable. Flame duration Not applicable.

## Section 10. Stability and reactivity

**Chemical stability** The product is stable.

Possibility of hazardous

reactions

Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid No specific data. Incompatible materials No specific data.

Hazardous decomposition

products

Under normal conditions of storage and use, hazardous decomposition products should not be

produced.

Article Number 25005445 Page: 4/7

## Section 11. Toxicological information

#### Information on likely routes of exposure

Inhalation May cause allergy or asthma symptoms or breathing difficulties if inhaled.

**Ingestion** No known significant effects or critical hazards.

**Skin contact** May cause an allergic skin reaction.

Eye contact No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

**Inhalation** Adverse symptoms may include the following:

wheezing and breathing difficulties

asthma

**Ingestion** No specific data.

**Skin contact** Adverse symptoms may include the following:

redness

Eye contact No specific data.

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### **Acute toxicity**

Not available.

Conclusion/Summary Very low toxicity to humans or animals.

Irritation/Corrosion

Not available.

#### **Sensitisation**

Not available.

#### Potential chronic health effects

General No known significant effects or critical hazards.

Inhalation Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low

levels

**Ingestion** No known significant effects or critical hazards.

Skin contact Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low

levels.

Eye contact

No known significant effects or critical hazards.

No known significant effects or critical hazards.

Mutagenicity

No known significant effects or critical hazards.

Teratogenicity

No known significant effects or critical hazards.

Developmental effects

No known significant effects or critical hazards.

Fertility effects

No known significant effects or critical hazards.

No known significant effects or critical hazards.

**Chronic toxicity** 

Not available.

**Conclusion/Summary** Very low toxicity to humans or animals.

Carcinogenicity

Not available.

**Conclusion/Summary** Very low toxicity to humans or animals.

**Mutagenicity** 

Not available.

**Conclusion/Summary** No known significant effects or critical hazards.

**Teratogenicity** 

Not available.

**Conclusion/Summary** No known significant effects or critical hazards.

Reproductive toxicity

Not available

Article Number 25005445 Page: 5/7

Validation date 17 February 2021

Version 10

Cy™5-dCTP, 25 nmol PA55021

Conclusion/Summary

No known significant effects or critical hazards.

#### Specific target organ toxicity

Not available.

#### **Aspiration hazard**

Not available.

#### **Numerical measures of toxicity**

#### **Acute toxicity estimates**

Not available.

## Section 12. Ecological information

#### **Ecotoxicity**

No known significant effects or critical hazards.

#### Aquatic and terrestrial toxicity

Not available.

#### Persistence/degradability

Not available.

#### **Bioaccumulative potential**

Not available.

#### **Mobility in soil**

Soil/water partition coefficient (Koc) Not available.

Other adverse effects

No known significant effects or critical hazards.

## Section 13. Disposal considerations

#### Disposal methods

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
